PROFESSIONAL SUMMARY

Java Full Stack Developer with knowledge of Java, JDBC, Hibernate, Spring Framework, SQL, HTML, CSS, and JavaScript. Proficient in Object-Oriented Programming (OOP), database management, and web development. Seeking a Java Full Stack Developer Fresher role to apply technical skills, contribute to software development projects, and continuously enhance development expertise.

TECHNICAL SKILLS

- **Languages and Core Java:** Java, SQL, Object-Oriented Programming (OOP), Collections, Exception Handling, Python(basics)
- **Backend Technologies:** JDBC, Hibernate, Spring Framework, Spring Boot
- **Frontend Technologies:** HTML, CSS, JavaScript
- **Databases:** MySQL, Relational Database Management System (RDBMS)
- **Tools and Technologies:** Git, GitHub, Maven, Power BI, Tableau
- **Operating Systems:** Windows

PROFESSIONAL EXPERIENCE

Java Full-Stack Intern

Jan 2026 – Present

JSpiders, Bengaluru

- Developed and implemented Java-based applications using Core Java, JDBC, Hibernate, and Spring Framework concepts.
- Designed and executed SQL queries in MySQL for data retrieval, manipulation, and database management.
- Built frontend interfaces using HTML, CSS, and JavaScript for responsive web applications.
- Applied Object-Oriented Programming (OOP) principles, Collections Framework, and Exception Handling in application development.
- Utilized Maven for dependency management, project configuration, and build automation.
- Performed debugging, testing, and troubleshooting to improve application functionality and code quality.

TECHNICAL PROJECTS

E-Commerce Web Application | [GitHub](#)

- Developed a full-stack e-commerce application using Java, Spring Boot, Hibernate, MySQL, and Thymeleaf.
- Implemented product management, shopping cart, order processing, and user authentication features.
- Integrated Razorpay payment gateway and Cloudinary for secure payments and image management.

Plant Disease Detection System | [GitHub](#)

- Developed a plant disease detection system using Python, TensorFlow, and Flask.
- Trained a machine learning model to identify plant diseases from uploaded images.
- Built a web interface for image upload and disease prediction.

Power BI Data Analysis Dashboard | [GitHub](#)

- Designed an interactive dashboard using Power BI for data visualization and analysis.
- Processed and transformed data to generate meaningful business insights.
- Created reports and charts to track trends and support decision-making.

EDUCATION

Bachelor Of Engineering CSE(AIIML)

2022 – 2026 KLS VBIT HALIYAL

CGPA: 8.71 / 10

CERTIFICATIONS

- Learning Go: Data Structures and Algorithms – Infosys Springboard
- Green and AI Skill Program by Edunet Foundation
- Power BI Projects – Infosys Springboard
- Introduction to Python – IIT Bombay (Spoken Tutorial)
